always charged and ready for use

suitable for 0.5 ml to 100 ml pipettes

protected by filter and safety valve

ergonomically shaped handle

LCD display indicates the level of battery charge

HTL LAB SOLUTIONS

SWIFTPET+ is a revolutionary engine powered pipetting aid designed for cordless work with glass or plastic pipettes in the 0.5-100 ml range. Carefully modeled lightweight handle, together with smooth trigger buttons guarantee effortless pipetting even during extensive use. For convenient storage our device is equipped with "rest wings". Easily accessible switches allow to choose different operation modes depending on the volume of a pipette and viscosity of liquid. In order to protect the device against overfilling we equipped the **SWIFTPET+** with PTFE filters and safety valve, blocking any liquid from entering the unit. The filter and pipette holder can be easily exchanged and autoclaved. LCD display indicates setting options and level of battery charge.

Ordering information

IVD CE

Model	Cat. no.
